

The Road To Retirement Security

MetLife

To determine if an income annuity is right for you, you should start by comparing your expected income during retirement with your anticipated expenses. If your total income is greater than your total expenses, you are on the right track and have enough income to meet your needs.

On the other hand, if your expenses exceed your income, you will need to tap into your retirement savings to provide additional income. But how much income can you expect from your savings and how long will it last before you run out of money?

Using the worksheet on the back page, you and your financial services representative can determine whether you will have sufficient income to meet your needs and enjoy the retirement you planned.

| STEP ONE: | Assess your income resources. Estimate how much income you can count on and where it will come from. |
| STEP TWO: | Determine your living expenses. Include basic living expenses and other discretionary expenses that you could possibly do without. |
| STEP THREE: | Calculate the difference. Determine if you have enough income to cover your expenses. |
